

Name: _____

This assignment can be used as a homework assignment or I have used it as a "homework credit" that can replace a missed homework assignment. I had my students fill this out by the end of the first week of class. It would be wise to have them submit this assignment electronically, so you have a copy and can come back to it during the semester if students need "reminded" of their goal and how they had planned to get it achieved.

Please answer the following questions using a word processor or in your best handwriting. This paper is due in class on Monday, August 31st and will count for a homework credit.

1. What are your goals for this course and how to you intend to achieve these goals?

2. What do you expect from me, as your instructor?

3. What are your past experiences with math? Successes? Failures?

4. What is the first word that comes to mind when you hear the word MATH?
